

# Join us to make a difference

**Do you enjoy working with others and have a passion for improving the patient experience in health care?**

**Northern Health** is looking for two community members to participate on the **Preventing Delirium & Managing Cognitive Impairment subcommittee**.

**Delirium is a sudden, temporary confusion that affects thinking and attention — often triggered by illness, surgery, or medication.**

Your valuable contribution will help us with our work to prevent delirium in hospital. We welcome people from diverse backgrounds.

**Please talk with us** if you are interested and can:

- share experiences of being a patient or carer in the health service
- share ideas, listen and be objective in meetings.

**Medical knowledge is not required**  
**Orientation will be provided**

Our staff will support you to join a one hour monthly meeting online to participate from the comfort of your own home.

**For further information or to apply email:** [consumerparticipation@nh.org.au](mailto:consumerparticipation@nh.org.au)

**To find out how you can get involved** please visit: [www.nh.org.au/support-us/consumer-community-participation](http://www.nh.org.au/support-us/consumer-community-participation)
