

Research Highlights

Grand Round Event- Nurses and Research - Why it matters.

At our recent Research Grand Round, keynote speaker Professor Mei Krishnasamy (Professor of Nursing, UoM) was joined by a panel discussion that attracted over 100 attendees both in person and online. It was a fantastic opportunity to highlight the vital contributions nurses make in the research field. We're incredibly proud of the impactful work our nursing researchers are doing.

Training opportunities

The TGA has yet to endorse the Good Clinical Practice E6(R3) however, if your sponsor requires you to be GCP E6(R3) compliant.

👉 [Click Global Health Training Centre for more information](#), where the course has been fully restructured to reflect the latest updates.

If you complete a new or refresher GCP course, please remember to upload your certificate to LMS.

RESEARCH WEEK
20-24 OCTOBER 2025
INSPIRED RESEARCHERS
Northern Health

Exciting news!

Research Week is coming soon — a celebration of innovation, discovery, and academic excellence. Explore groundbreaking projects, attend inspiring talks, and connect with fellow researchers.

Congratulations to **Dr Rami Subhi** and team on their Lancet Publication!

Rami, a Global Health Research Fellow, is undertaking a PhD focused on understanding medical oxygen systems in low-resource settings. His research asks a critical question: why do the majority of patients in low-income and middle-income countries (LMICs)—not receive medical oxygen when they need it, resulting in countless preventable deaths and heartache? The COVID-19 pandemic brought this inequity into sharp focus, but the problem persists well beyond the crisis.

The COVID-19 pandemic brought this inequity into sharp focus, but the problem persists well beyond the crisis.

This work not only highlights ongoing gaps but also sets a baseline for future research to track progress. Rami and his team hope to drive meaningful change by drawing attention to this persisting problem.
