

Northern Health

Kilmore District Hospital

Graduate Nurse Program 2027

Our Graduate Nurse program aims to provide a supported environment for graduate registered nurses to transition into the workforce, consolidating both theoretical knowledge and clinical skills. We are looking for caring, enthusiastic applicants with a passion for nursing.

Kilmore District Hospital is a site of NH that provides a comprehensive range of acute and aged care services to our rapidly increasing catchment population. Inpatient, Perioperative, Outpatient, District Nursing and Aged Care services are provided for the community of Kilmore and surrounds.

1

Structure and Content

Our 12-month GNP at Kilmore District Hospital has one intake in February, with graduates working a rotating roster, 8 days per fortnight.

Clinical experience is gained across three rotations into Acute, Perioperative and Age Care nursing.

Thorough orientation, supernumerary time and professional development days strengthen the theoretical components of the program. Access to online resources, workshops, seminars and in-services further builds knowledge and confidence.

2

Support and Opportunity

A dedicated team of Educators and Support Nurses work across the week to provide clinical support, guidance and mentorship and ensure resources are easily accessible. Our education and training is delivered in an environment that is inclusive, recognises diversity, and promotes **kindness**, supporting **safe** opportunities to learn **together**.

safekindtogether
