

Join us to make a difference

Northern Health are looking for two people from our community to join our **Medication Quality and Risk Management Committee**.

This committee helps to provide safe and effective use of medicines with a focus on person centred care – where the patient is at the centre of decisions, treatments and care given.

Your experience of being a patient or carer is important– medical or pharmacy knowledge is not required.

You will be a great match for this voluntary role if you can:

- Share experiences of being a patient or carer in the health service
- Share your ideas to improve medication safety

Our staff will help you to learn about how the monthly meetings work and provide support to participate. You can join in meetings from home or attend one of Northern Health sites along with a staff member.

For more information:

Phone: 0403 066 175 **Email:** consumerparticipation@nh.org.au
