

Join us to make a difference

Northern Health are looking for two people from our community to join our Standard 5 Bariatric and Tall Patients

- This committee helps to coordinate and improve care, safety and support for bariatric patients – individuals with obesity, especially those requiring specialised equipment, procedures or clinical attention due to their size or weight or height
- Improve patient care and outcomes
- Enhance staff safety and preparedness
- Standardize equipment and environment readiness
- Develop policies and guidelines
- Foster cross department collaboration
- Patient centered planning
- Improve health inequality and enhance patient dignity

Your experience of being a patient or carer is important– medical knowledge is not required

Our staff will help you to learn about how the monthly meetings work and provide support to participate. You can join in meetings from home or attend one of Northern Health sites along with a staff member.
